Objective

I am just starting my career in the health care field, and I would like to start it here! I am a Certified Medical Assistant, I am currently going to college at Inver Hills Community College, I will be applying to their nursing program soon. Inver Hills is taking a holistic approach for their admissions into the program, so they are deciding more based on experiences. I would like to start getting the experience that I need, I would prefer part-time for this winter and spring, as I am a college student taking courses, during the summer I would be happy to work full time.

I hope to hear back from you soon!

Education

DIPLOMA | MAY 16, 2021 | KEARNEY HIGH

- Kearney High School Kearney Missouri
- **College** I am Currently enrolled at Inver Hills
- **Certifications**
- I am a Certified Clinical Medical Assistant, I passed the National Health Care Association CCMA test in May. I am Hipa trained, I am Aed/Cpr Certified

PREVIOUS EXPERIENCE

- I have only had one job, and that job was in the construction field. I have worked construction for over two years, and I have learned many life lessons, one of the biggest things that I learned, is that I do not want to do that for the rest of my life. That was a great first Job as a high school student, but as a college student, I should start working in my major.
- One might think that you do not get any experience in high school, but I took every healthcare related course that I could; and I enjoyed every minute of it. While I was in high school, I trained for the CCMA exam offered by The National Health Care Association.
