## Professional Summary

I am a seasoned CNA that has been described as hard working and attentive with my work, much of which is broken down into smaller tasks that can be completed by myself or together with my team. One of the things I desire most about a job is being able to come into work with a positive, bubbly attitude. It comes hand in hand with being able to continuously experience patients tell me I'm "always smiling". I enjoy problem solving, challenges, and anything that sparks a new idea! I'm always looking for new ways to accomplish my goals in the workplace. One of the things I enjoy most about my job is building strong relationships with the people I work with, as well as the people I care for; they are my number one priority. My experience has been gained working in Rehab, Nursing, and Assisted living facilities as well as other face to face customer service jobs in my past.
