## Additional Information

---

I have been a caregiver since 1999 in many different facilities and capacities. In very few candidates will you find my level of passion and love of caregiving. I see what I do as a sacred act of compassion. I love what I do, and will never stop striving to become a better caregiver.

My goals include nursing school at NWTC in the fall of 2020, and gaining a wider base of experiential knowledge in cares, environments, skills, and residents and patients. I come with 20 years experience and a can do team work attitude.

I am at the end of fulfilling scholarship obligations at my current employer and am ready for life's next adventure.
