Demonstrated results-oriented, innovative Advanced Practice Registered Nurse with expertise in educating the healthcare community concerning end-of-life and home care. Possesses extensive knowledge about the scope of comprehensive hospice care services, regulations, philosophy, and clinical intervention. Recognized as a compassionate care provider who connects with patients and staff members and works as a nurse leader to help individuals in the community. Creates a climate of learning and excellence that encourages growth and quality. Now seeking to join a very strong and knowledgeable team as a Family Nurse Practitioner to make a positive contribution all around.

Authorized to work in the US for any employer

## Work Experience

---

### **Registered Nurse**

Emergency Department - Libertyville, IL

November 2018 to Present

- Collects current symptoms, as well as a detailed patient history and then consults and coordinates with health care team members to assess, plan, implement and evaluate patient care plans
- Performs triage, while considering both physical and psychosocial elements
- Manages basic and advanced life support needs and stabilizes patients until the attending physician is available, based upon nursing standards and protocol
- Communicating professionally between different members of the care team including other facilities, physicians, nurses and healthcare associates, to ensure patient case and plan of care is well established and understood among all members.
- Documented and successfully applied findings of patient data encompassing assessment results, interventions, medications, patient responses, and treatment changes.

### **Registered Nurse, Emergency Department**

Northwestern Memorial Hospital - Chicago, IL

November 2017 to November 2018

- Quickly and accurately assess patient care needs and work collaboratively with doctors and staff to provide exceptional care
- Manage multiple cases simultaneously, prioritizing needs continually while working at maximum efficiency without compromising quality of care
- Provide follow up care instructions to patients and make necessary referrals
- Communicated with patients and patient families with empathy and education on patient diagnosis and treatment interventions

Attributed to the continuum of care of patients by ensuring thorough nurse hand-off reports were conducted at shift changes, as well as when transitioning patients to a different level of care.
