Work Experience

RN Specialty Clinic

Advocate Aurora Health - Oshkosh, WI

August 2018 to Present

Currently work in a specialty clinic as the only RN in the department working with 3 providers, 2 LPNs and 6 MAs. I triage in baskets for all 3 providers. I have my own schedule of patients to provide direct patient care. I see patients for diabetic foot care including nail care, post op care, and dressing changes with wound vac care. I collaborate with many different departments and physicians to communicate care such as referrals and temporary outpatient placement for discharge planning. I also collaborate to find community recourses for patients and family members, as needed.

RN Case Manager

Calumet County Home Care & Hospice - Chilton, WI

October 2014 to August 2018

Evaluate assigned home health care and hospice patients and identify problems/needs including but not limited to physical, emotional, psychological, environmental and educational. Work with all Insurance including Medicare. Complete Medicare required OASIS. Obtain prior authorizations from insurance companies, provide chart audits. Develop, communicate, and coordinate a goal oriented POC for each patient in collaboration with the patient, M.D., and family. Delegate appropriately and ensure documentation of interventions. Evaluate patient's response to the care provided and modifies the POC based on signed MD orders. Communicate effectively and timely with all members of the health care team with confidentiality. Educate on disease management, home safety, medication safety, end of life care, POC and anticipated outcomes. Provide nursing services in homes and facilities. Teach, demonstrate, supervise and evaluate services provided in the home by other agency staff, including CNAs and therapies. Participate in developing and implementing a community disaster plan. Office coverage each day, answering phones and assisting walk in clients. RN completes RN and CNA schedules. Required to be on call several days of the week, for home care and hospice, for all of the county and beyond. On call visits may include admissions to home care and/or hospice, decline in hospice patients, medication management, deaths, wound care, catheter care, PICC line care, ect.

RN/Supervisor

Appleton Health Care Center - Appleton, WI

May 2014 to October 2014

Responsibilities

Communicate and collaborate with all nursing staff, Dr's, other health care professionals, and families. Charting and documentation. Taking and following physician orders. Supervise facility including other RNs, LPNs, and CNAs. Answer all supervisor calls including call ins. Adjusting the schedule as appropriate,

and filling needed positions. Assess and care for patients from beginning to end, including making and following care plans for each patient individually.

Accomplishments

I bring a lot of positive energy to the workplace. I am a caring and compassionate nurse. I get along with others easily, and have good communication skills. I am always there and on time - dependable. I not only enjoy learning new things, but also teaching others with every opportunity.

Skills Used

Communication, individualized nursing judgement, charting, admissions, assessments, narcotic count, medication administration, injections, Peg tube care, post op rehab, drug dependancy care, foley cath, wound/surgical dressing changes, dementia care and interventions, hospice - end of life care

Prepare and serve nutritious meals

- Discuss food preferences with clients and health care staff
- Assist in menu planning
- Maintain a clean and healthy environment
- Encourage clients and give them options following their diet

RN

Chilton Medical Center
December 2011

under the supervision of another RN. I was assigned to the med/surg unit. Some of the other departments I worked in include: Emergency room, wound care clinic, operating room, recovery room, SUN room (stepped up nursing - in place of intensive care)

I practiced many of the same skills and core responsibilities as I did throughout my clinical rotations. I did these using my own judgment, and making critical decisions on my own. I was the go to person. I learned to build a great foundation through caring, leadership, decision making, trust, teamwork, and skills throughout this experience, whether it be with the patient, patient's family, another RN, a CNA, doctor, or collaborating with another department. I learned completely what holistic care means, and how to implement it with each and every person as an individual. I cared for patients from age 5 to age 95, some with learning disabilities, and also some with mental disorders.
