I'm a dedicated Nurse professional with 7 years of diverse Nursing experience in Bedside critical care in Cardiac Telemetry, Cardiac step down, float pool, and medical surgical telemetry. I specialize in delivering compassionate, consistent, and individualized patient care. I thrive on core values and ethics to promote holistic healing approach to all my patients by steady involvement, reporting, team building, and ongoing process improvement. I am ambitious and grow in a collaborative, fast-paced culture where a team thinks critically, works hard and believes in concrete objective results.

Work Experience

Clinical Research Nurse I

University of Chicago - Chicago, IL

February 2021 to Present

- Professional conduct in the presence of subjects, research staff, sponsors, monitors, etc.
- Provides care to participants per study protocol by utilizing appropriate clinical judgment and critical decision making.
- Participating and planning of new study protocol implementation in most accurate and designed manner in compliance with sponsor and investigator.
- Collecting patient data according to protocol specifications, reports variances to the research team, integrate evidence-based practice outcomes, and administer research interventions.
- Document protocol exemptions and deviations as needed.
- Communicate regularly with the principal investigator about study related issues.
- Ensure the current approved informed consent form, and follow up procedures with potential study subjects.

Registered Nurse Unit Manager I

Luther Manor - Milwaukee, WI

October 2019 to December 2020

Establish standards of nursing care for the unit, applying evidence-based standards and health care research.

- Monitor patient care to ensure it meets the facility's standards, and review patient records to analyze the effectiveness and efficiency of the care provided by the unit.
- Provide feedback and constructive solutions to questions or concerns about a patient's care.
- Provide on-going consultation to the patient's physician or recommend treatment options.
- Monitor overall care; review an individual patient's case, especially if it's complicated or if the patient is not responding to treatment. Address questions or complaints brought forward by patients or their families.
- Provide on-going training and staff development programs.
- Represent the unit's interests, consulting with senior management if the staff has questions or concerns, recommending changes and improvements, and offering the unit's opinion regarding proposed changes or decisions under consideration by the facility's leadership staff.

ADVOCATE AURORA AT HOME

Registered Nurse Case Manager

Milwaukee, WI

May 2018 to 2019

Evaluate health status through the ongoing collection and assessment of health data. Perform health teaching, health counseling, and interdisciplinary care coordination

- Provide, review and monitor treatment plans that are supportive and restorative to life and well-being either directly to the patient or indirectly through consultation with, delegation to, supervision of, or teaching of family members or primary caregivers.
- Refer patient as needed for additional services, further evaluation or treatment
- Complete accurate and prompt documentation in accordance with agency and regulatory guidelines
- Demonstrate sound judgment, appropriate problem-solving and communicate effectively with clients, families, caregivers, other healthcare team members and supervisors.
- Daily and concurrently involving in the management of patients who were recently discharged from hospital by comprehensive assessment, planning, interventions, and evaluations of appropriate level of care.
- Proficient collaboration with other members of the health care team to ensure satisfactory patient outcomes. Working closely with physicians and multidisciplinary team members to develop a plan of care for each patient from admission through discharge followed by transition to home.
- Assesses and responds to patient and family needs by coordinating efforts of multidisciplinary team members to identify and resolves barriers that hinder effective patient care.
- Efficient nursing to enhance the continuity of care and cost effectiveness by integrating the functions of case management, resource management, clinical documentation management, and discharge planning.
- Maintains up-to-date patient records so that problems, plans, actions and goals are accurately and clearly stated and changes are reflected as they occur. Initiates and sustains, as needed, the implementation of orders for medications and treatments as prescribed by the provider in the provider's plan of care
