Skills

I am a trained and highly experienced critical care nurse with experience in prioritization, clear and concise communication, attention to detail, time management and compassion. I am looking to make a career transition and I believe with my background and skill set I can be an asset to this position.

Experience

October 2017 - PRESENT

Hennepin Healthcare; Emergency Room – Registered Nurse

- Assist with the use of hemodynamic and cardiac monitoring systems (including central lines and arterial lines) and mechanical ventilators.
- Crossed trained to all areas of the Emergency Room including triage, main area, and the stabilization room.
- Precepting new nurses entering the Emergency Room.
- Proficient in managing medically complex patients including medication drip titration, frequent and thorough assessments, working in a collaborative environment, communicating concerns to physicians in a timely and coherent fashion and, manage patient care in accordance with the care plan.
- Able to educate patients and family members about disease process, purpose of medical treatment regimen, and care plan in an understandable and inclusive way.

January 2014 - October 2017

Abbott Northwestern Hospital; Critical Care Float Pool – Registered Nurse

- Assist with the use of hemodynamic and cardiac monitoring systems (including Swan Ganz catheters, central lines and arterial lines), mechanical ventilators, intra-aortic balloon pumps, continuous renal replacement therapy equipment and ventricular assist devices.
- Crossed trained in medical/surgical/neurological ICU, cardiac ICU, telemetry floors, emergency room, and rapid response unit.
- Precepting new nurses entering the Critical Care Float Pool.
- Proficient in managing medically complex patients including medication drip titration, frequent and thorough assessments, working in a collaborative environment, communicating concerns to physicians in a timely and coherent fashion, and manage patient care in accordance with the care plan.
- Able to educate patients and family members about disease process, purpose of medical treatment regimen, and care plan in an understandable and inclusive way.

March 2011 - January 2014

Abbott Northwestern Hospital; Interventional Radiology – Registered Nurse

- Proficient in moderate sedation and airway management.
- Experience in monitoring patients pre, intra, and post procedure for a wide variety of neurological and peripheral vascular procedures including, but not limited to, treatment of strokes, port and dialysis access placement, vascular stenting, biliary and hepatic drain and stent placement, and gastric tube placement/replacement.

February 2008 - March 2011
