However, I have experience what it is like to work in the health services field. I also know how hard it is to work towards that field. I am currently enrolled in the Health Services program at Bryant Stratton College. This was wonderful experience learning more about the health system. I have worked at a nursing home called The Jewish Home and I am also a Personal Care Worker. In Additionally, working in the health services industry was a great experience, because you learn about different people, you communicate with all different people and mostly you get to understand more about the things that goes on with your body. Soon, working in this field will better me to understanding more about the health services industry. I also will be dedicated to my job.

Authorized to work in the US for any employer
