Working as a Family Nurse Practitioner within a progressive healthcare organization; providing safe, effective, compassionate treatment and care to patients of diverse socioeconomic backgrounds.

Authorized to work in the US for any employer

Work Experience

APRN

Omni Healthcare - Chicago, IL

July 2020 to July 2021

Order and schedule laboratory studies and diagnostic procedures; explain necessity, preparation, nature and anticipated effects of scheduled diagnostic and therapeutic procedures to the patient.

Conduct physical examinations and health assessments.

Interview and obtain medical information required for admission history and physicals.

Developed strong interpersonal skills and the ability to work independently.

Ability to display organizational skills that benefit both the patient and the interdisciplinary team.

Demonstrate written and verbal communication skills, as well as incorporate analytical skills to properly assess and treat the patient population.

Registered Nurse (RN)

West Suburban Hospital - Oak Park, IL

October 2010 to July 2020

Oak Park, IL - Progressive Care Unit/CCU 10/2010- Present

Provide critical and compassionate care to patients with life threatening illnesses.

- Advocate for patients' and families' needs, or provide emotional support for the patient and family.
- Evaluate patients' vital signs and laboratory data to determine emergency interventional needs.
- Monitor patients for changes in status or indications of conditions such as sepsis or shock, and treated them accordingly.
- Participate in continuing education to improve practice and clinical skills.
- Documentation for up to five patients, which included treatment plan, interventions, outcomes, or planned revision.
- Facilitate one on one teaching sessions with patients and families to ensure proper care is given once discharged. Core measures such as congestive heart failure, stroke, and acute myocardial infarction are the major areas of focus. Other topics covered are medication compliance and follow up appointments with their primary care providers.

- Research and teach in-services to co-workers on different safety measures in the unit.

APRN

Concordia University - River Forest, IL
September 2019 to March 2020

Assesse patient conditions using medical history, patient vital signs, physical evaluation, symptoms, diagnostic tests and more.

Identify specific diagnoses and develop an appropriate plan of treatment using medications, therapy and other healthcare solutions.

FNP Clinical Student

Immanuel Family Health Center - Indianapolis, IN
January 2018 to April 2018

Completed 80 clinical hours in family medicine setting, with patients ranging in age from newborn to geriatric. Responsibilities included taking patient histories, performing assessments, ordering and reviewing results of diagnostic tests, diagnosing, prescribing treatment regimens and monitoring efficacy, provide health education, and preventative services.

FNP Clinical Student

Family Health Center in Plainfield - Plainfield, IL
August 2017 to December 2017

Completed 250 clinical hours at a multidisciplinary clinic that provided comprehensive care to a population of all ages, starting at age 1 week. Provided primary care, case management, and medication management. Diagnosed and treated chronic health issues and provided minor acute care for: upper respiratory infections, urinary tract infections, pneumonia, influenza, bronchitis, otitis media/externa, cellulitis, hypertension, diabetes mellitus, obesity, and hypercholesterolemia.
