Work Experience

Registered Nurse, Medical City Children's Hospital February 2018 to Present

Super Pediatric Float Pool Float to all of the following pediatric units according to staffing needs of the facility: NICU, PICU, CHSU, Pediatric ER, Pediatric Hem/ONC & BMT, and all Pediatric floors. Provide exemplary care in high pressure, critical care areas with a variety of specialized patient populations.

Registered Nurse, Medical City Children's Hospital November 2016 to February 2018

Level IV NICU RN, 80 beds

- Perform direct patient care for critically ill infants and high risk preterm infants, within the RN scope of practice, with an emphasis on the critical thinking, the nursing process and age appropriate care.
- Perform comprehensive nursing assessments, formulate plan of care, implement care, evaluate responses and outcomes to therapeutic interventions, and communicate and collaborate with the interdisciplinary healthcare team to promote, maintain, and restore health.
- Manage and provide complex care for extremely high risk preterm infants as early as 22-24 weeks gestational age, on high frequency oscillating ventilators/conventional ventilator support, central and umbilical lines, TPN/Intralipids, fluids and drips.
- Act as a patient advocate to implement care and direct care to ensure patient safety in the clinical practice environment; educate families on disease processes, interventions and plan of care; provide best care practices and ensure the health and overall wellbeing of the family unit through education and emotional support.

Registered Nurse, Children's Healthcare of Atlanta March 2015 to October 2016

Level III NICU RN, 42 beds

- Manage and provide complex care for other acutely ill, preterm and high risk infants with multiple diagnoses and congenital anomalies, neurologic, gastrointestinal, pulmonary, renal, and cardiac concerns requiring advanced ventilation, during all phases of the critical care cycle while focusing on developmental and patient centered care.
- Determine patient care priorities, assess and evaluate patient's clinical status as well as care needs, monitor closely and recognize signs and symptoms of deterioration consult with MD and NNP and interdisciplinary team as needed for necessary changes in the plan of care and or needed interventions.
- Exercise time management in the care of up to three critical patients at once.
- Perform admissions and discharges in a timely manner while addressing the needs of patients and their families.
- Provide comfort, emotional support, age appropriate teaching, and status updates to parents and family members of NICU infants.

Registered Nurse, Children's Healthcare of Atlanta March 2014-February 2015

Level 1 Trauma Center, Pediatric Emergency Department RN

- Caring for emergency room patients at a level 1 pediatric trauma facility with 30 beds and 4 trauma bays
- Effectively utilize critical thinking skills to initiate ED Caregiver Guidelines and Protocols to safely stabilize patients in crisis; reassess during and post-interventions.
- Efficiently manage and prioritize care for up to four high risk patients at one time, with various injuries, pathologies, and traumas.
- Stabilize and transfer critically ill patients to inpatient units, surgery, psychiatric facilities, and intensive care units.
- Triage, assess, document, and perform nursing interventions as appropriate.
- Continuous assessments, updating statuses and reviewing plan of care with emergency medicine physicians, parents, and the interdisciplinary team.
- Ensure safe patient care, admissions, and discharges
- Provide information, teaching, and support to patients and their families

Education

Bachelors of Science Major in Nursing, December 2013

Georgia State University, Summa Cum Laude, President's List, Sigma Theta Tau, Student of the Semester Awards, Overall GPA 4.03
