EXPERIENCE

Registered Nurse, ER, July 2014- March 2019
El Camino Hospital, Mountain View, CA

- Took part in committees and unit partnership to implement new standardized procedures and protocols to use in an expanding ER from 15 beds to 34 beds.
- RN III project completed in revising and training ER doctors and nurses on adult DKA/insulin drip protocols
- Cared for Stroke, Cardiac and Respiratory difficulty adult and pediatric patients in an ever growing ER that saw about 200 patients a day.

Registered Nurse, ER, March 2013- September 2014
Regional Medical Center, San Jose, CA

- Training in the care of cardiac and trauma patients at a level II trauma center
- Implementing standardized protocols and critical thinking skills to assess and pre order labs and radiology for patients prior to medical screening exams by ER MD
- Nursing and caring for adults and children of all ages

Registered Nurse, ER, January 2013- March 2013
Palomar Medical Center, Escondido, CA

- Successfully being able to care for patients in a timely manner in a 52 bed ER
- Trained to work the front of the ER (triage and fast trak) to better understand the flow of the unit and assist in having patients assessed within a few minutes of arrival

- Worked as part of an OB team to facilitate and manage the large number of imminent births that took place in the ER

Registered Nurse, ER, September 2011- December 2012
Kaweah Delta Medical Center, Visalia, CA

- Obtain detailed and focused H&P and current illness reports on all patients during triage
- Use critical thinking skills to assess patient's condition and order protocol based labs and procedures prior to the doctors' arrival
- Implement standardized protocols to initiate treatment for traumas, heart alerts, sepsis alerts, pre op patients etc
- Collaborate with all staff members to quickly and efficiently respond to and control emergent and critical situations

Registered Nurse, Step Down ICU, July 2010- September 2011
Regional Medical Center, San Jose, CA

- Perform thorough assessment, planning, implementation, and evaluation of up to 4 adult and geriatric patients and their families
- Coordinate and prioritize care requiring multi-disciplinary services in a timely manner
- Provide care for patients during pre op, intra op and post op phases of scheduled procedures using hospital set protocols, physician orders, and assertive nursing judgment
- Report pertinent observations and patient reactions to appropriate personnel (physician, charge nurse and/or nursing supervisor) and record observations accurately, legibly, and concisely.
- Assist team members in giving care, or administering direct care when professional nursing skills and/or judgment are needed.

Registered Nurse, Step Down/ Telemetry Unit, September 2009- June 2010
Renown Regional Medical Center, Reno, Nevada

- Used critical thinking skills while performing patient assessments, adjusted patients' care plans to reflect their current needs, and implemented those plans into the daily goals for the patients.
- Utilized ACLS protocols to analyze and treat cardiac arrhythmias in critically ill patients
- Provided daily patient teaching regarding diagnosis, daily lifestyle choices, and healthier living
- Communicated well with all members of the interdisciplinary team to ensure quality and thorough patient care.

ADDITIONAL SKILLS

Conversational French, Sign Language and Ethiopian
