CLINICAL EXPERIENCE

Pediatric Clinical Rotation

August 2016 – November 2016

South Street Family Medical Center, Nashville, TN with Dr. S. L. Lampkin
Total hours: 124

Assessed and diagnosed patients with ages ranging from newborn to 17 years old. Performed milestone and wellness checks along with vaccination administration and age-related education. Performed sport physicals, PAP smears, suture removal, STD screening, and pregnancy test results. While seeing each patient alone and then with Dr. Lampkin, I was able to learn vast amounts of information about this age group and when consultation was needed.

Adult Clinical Rotation

January 2017 – April 2017

South Street Family Medical Center, Nashville, TN with Dr. S. L. Lampkin
Total hours: 249

Assessed and diagnosed patients with ages ranging from 18 to 92 years old. The majority of these patients were seen for sick visits, yearly check-ups, blood pressure and diabetes follow-ups, nursing home and skilled nursing facility yearly visits, follow-up from hospital admission and motor vehicle accidents, and referral requests. Assisted prescribing appropriate medications for various diseases and illnesses as well as analyzed laboratory results.

Women's Health Rotation

June 2017 – July 2017

Murfreesboro Medical Clinic, Murfreesboro, TN with Erin Meckley, WHNP
Total hours: 130

Assessed and diagnosed female patients with ages ranging from 15 to 82 years. The majority of patients in this population were seen for sick visits, prenatal and postnatal visits, contraception prescriptions, and menopause complications and prescriptions. Performed many pelvic and breast exams, PAP smears, diagnosed STDs and prescribed appropriate medication by collecting and interpreting stains with onsite microscope, and removed IUDs. Educated patients about various contraceptive methods and devices as well as medications, STD signs and symptoms, and pregnancy related information with assessment for postpartum depression.

Family Nurse Practitioner Practicum**February 2018 – April 2018**

L&K Family Practice, Hermitage, TN with Lynda Byrd, FNP-C

Total hours: 241

Assessed and diagnosed patients with ages ranging from 3 to 90 years. The majority of these patients were seen for sick visits, yearly check-ups, blood pressure and diabetes follow-ups, nursing home and skilled nursing facility yearly visits, follow-up from hospital admission and motor vehicle accidents, and referral requests. Assisted prescribing appropriate medications for various diseases and illnesses as well as analyzed laboratory results. Specialty procedures included: punch biopsy for skin lesions and trigger point injections for pain management.

PROFESSIONAL EXPERIENCE**Registered Nurse - Neuro Intensive Care Unit****May 2015 – Present****Vanderbilt University Medical Center Nashville, TN**

- Management of critically ill patients with many requiring mechanical ventilation and multiple drip titrations
- Assisted Neurosurgeons and Neurologists with procedures such as lumbar punctures, external ventricular drain placement, central line/arterial line placement, and placement of subdural evacuating port systems
- Participated in daily rounds with various teams to optimize patient care and health outcomes
- Provided end of life and palliative care while being a patient and family advocate

Registered Nurse – Neurosurgery Ambulatory Clinic**February 2019- April 2019****Vanderbilt University Medical Center Nashville, TN**

- Functioned as clinic nurse for two Neurosurgeons, assisting in two clinic days with preparation, making sure schedules were not over-booked, diagnostics were completed prior to visits, and placing orders for follow-up care and referrals
- Managed message baskets for both doctors, completed FMLA paperwork, and triaged patients via phone
- Pre-op teaching for Craniotomies with discussion and signing of consents were completed, as well as, post-op visits with assessment of incision and staple or suture removal as required

Registered Nurse - Neuro Intensive Care Unit**October 2014 - May 2015****Skyline Medical Center Nashville, TN**

- Delivered care to patients with TBI, stroke, pre- & post-op aneurysm clipping/coilings, and sepsis working with Neurologists, Neurosurgeons, and the Trauma Team
- Management of various lines such as Arterial, CVP, ICP, Central and Peripheral
- Titrated drips to sustain blood pressures and sedation levels
- Collaborated with Respiratory Therapists to maintain appropriate ventilator settings

Registered Nurse - Neuroscience/Stroke/Seizure Monitoring Unit November 2012 - September 2014**Foothills Medical Center Calgary, Alberta Canada**

- Enhanced patient status for return to baseline function or better, by using a multi-focal approach and communication with various therapies and resources (such as PT/OT/RT/SP/Pharmacy/Social Work)
- Unit superuser for a research study on Duadopa Pumps in Parkinson's Patients
- Maintained lumbar drains for the correction of CSF leaks and a research study on NPH
- Cared for patients with brain tumors, a variety of autoimmune disorders, and monitored epileptic patients while being the sole nurse in the Seizure Monitoring Unit

Registered Nurse - Surgical/Neurology/Oncology Unit**August 2010 to October 2012****Skyline Medical Center Nashville, TN**

- Collaborated with a multi-disciplinary team to ensure the wellbeing of patients
- Empowerment of stroke, cancer victims, and pre- and post-operative orthopedic patients by providing education on procedures, medications, pain management, post-op drains and dressing changes, and discharge instructions
- Completed thorough neurologic and neurovascular assessments to aid in proper diagnosis and prompt intervention when required
- Administer oral, subcutaneous, and intramuscular medications; set up PCA pumps, worked with central and

peripheral lines, and provided alternate nutrition per nasogastric, peg tubes, and TPN
