Please accept this letter as my sincere interest in applying for a Family Nurse practitioner position at your institution. I am a masters prepared FNP certified by the AANC in May 2019. I am looking to embark on my journey as a FNP. I have over 7 years experience as an emergency room nurse, and know that I can manage the responsibility of this dynamic new role.

I was given the opportunity right out of nursing school into the exciting, dynamic and criticality of emergency medicine. Within my two years I managed to become preceptor to oncoming staff in the ED, I have initiated triage with ESI excellence after a year, lead over three Rapid improvement events (RIE) in regards to female follow up in GYN, Pain management, and Decrease in hospital UTI with foley insertion, and won "nurse rookie of the year 2014". I have been an employee of the month multiple times at NYP Cornell.

The change and transition for me into becoming a nurse practitioner came very early on in my career. Although I was able to help people, I felt that I was missing the full capacity of my patients. I wanted an opportunity to not only have a therapeutic relationship in task oriented situations, but I wanted to be able to go into the treatment side and diagnose. To fully manage a patient in primary secondary and tertiary care.

As my resume reflects, for me, being a provider is not just a profession, it's a field where I will continue my education receiving my doctorate and becoming as pursuing my passion for healthcare. I am both hands on and a critical thinker who can quickly learn new systems and develop expertise that will contribute significantly to any environment. Becoming a Nurse Practitioner is a career that I chose because I love being able to use my knowledge and compassion to heal, help, be a teacher to those who need education, and overall, putting a smile on a patient's face.

I am now seeking to align my experience and my skills with an institution that thrives on delivering excellent patient care consistent with following evidence based guidelines. I believe this opportunity would offer me a challenging, gratifying experience and would be a highly motivational position for me outside of the emergency room. Your unit blended with my eagerness should create a continuing commitment to ethical and personal patient care. Should you need any additional information, please feel free to contact me at your convenience.

Thank you for your time and consideration. I look forward to hearing from you.

Sincerely,

Deja S. Grant-Koenig, FNP
