OBJECTIVE

To obtain a Registered Nurse position while utilizing the nursing process to provide compassionate and efficient patient care

WORK EXPERIENCE

METHODIST HOSPITAL OF SOUTHERN CA

February 2012 - August 2014

Registered Nurse (Telemetry Department)

- Prioritize patient care while establishing an individualized plan of care to be achieved in a specific time frame.
- Utilize the nursing process to implement interventions that aid the patient to reach therapeutic goals.
- Educate patients and their families on health promotion, prevention of disease, and restoration of health.
- Monitor patient's progress and identify any change in status while maintaining communication with the Physician to ensure patient comfort and safety.
- Maintain optimal health of ventilator assisted patients by securing a patent airway through suctioning and completing thorough tracheostomy care.

Registered Nurse (Emergency Department)

August 2014 – April 2019

- Triage patients by assessing each patient's condition immediately upon arrival in order to determine acuity.
- Performing phlebotomy and intravenous insertion along with IM/SQ injections based on Doctors orders.
- Provide professional and efficient care by multitasking and prioritizing each patient's necessities accordingly.
- Initiate comprehensive nursing decisions based on patient assessment in a fast-paced environment.
- Establish a compassionate environment that supports the physical, emotional, and psychosocial needs of the patient.
- Provide specialized care of patients who present with stroke and/or STEMI symptoms per hospital protocol.
