## Cover page

I am seeking a new position that will allow me to advance my career, increase my skill set, and to be able to utilize all the skills I have already acquired by working in healthcare for so many years.

I started my healthcare career as a Medical Assistant working at Banner Desert Medical Center first as an ICU tech and next as an ER tech while attending nursing school.

I had to change positions when I earned my LPN. I work as an LPN providing influenza vaccines, working for Occ. Health, and for a registry company. I worked as a LPN for about 2 years while I finished up my RN.

I have been working as a RN since 2012. I started as a registry nurse working in Inpatient Hospice units and long-term acute care facilities. I then was hired to work for a busy Banner Hospice Inpatient unit. I really enjoyed being able to take care of those at the end of life but, I needed a change of location. Currently, I work at a busy Outpatient Observation Unit, taking care of adult tele and medical /surgical patients, including stroke rule out and myocardial infarctions rule outs.

I will be a great asset to your company because I am self-motivated and able to work efficiently and effectively by myself; but as well as a team player. I work well with my coworkers to provide exceptional patient care and to make a difference.

I am really excited for the potential opportunity to become a part of a new team, family and honestly believe that as a nurse I can make a difference in others' lives.
