WORK EXPERIENCE

Illinois Advocate Masonic, Chicago, IL

Registered Nurse, April 2020 - Present

- Contribute to the improvement of patient satisfaction scores through the development and implementation of safety strategies through Unit Council.
- Manage care of patients on a Medical Surgical- Oncology unit with a focus on medication administration, central line and port care, wound care, and G-J tube maintenance, IV medications, trach care, etc. with a 5:1 ratio.
- Treat, evaluate, report, and document changes in patient condition, while keeping the patient and family updated in their plan of care, with a focus on their needs as a whole, and collaborating with multiple disciplines.
- LOVE award winner of 2021 1st quarter for compassionate care and living out the values of the hospital.

The Clare, Chicago, IL

Registered Nurse, July 2019 - August 2021

- Assisted with safety assurance for residents, while maintaining state and federal regulations, as they relate to skilled nursing and long term care.
- Facilitated compassionate and therapeutic communication with residents and family, especially with end of life care or crisis situations.
- Promoted constructive working relationships between health care disciplines, other community staff members, residents, and caretakers; while managing medications, wound care, appointment management, IV antibiotics, foley care, G-J feedings and maintenance, with a 15:1 ratio.

Sittercity, Evanston, IL

Freelance Nanny, Sep 2018 - January 2020

- Performed housekeeping tasks, including cooking allergy appropriate meals, laundry, cleaning common areas and play spaces.
- Served as an on- call and short- term nanny for six families, caring for children under the age of five.
- Transported children to and from school, or other commitments and after school activities, while focusing on safety and time management of the family schedules.

St. Mary's Hospital, Decatur, IL

Certified Nursing Assistant, Jul 2017 - Sep 2018

- Collaborated with nursing staff and doctors to determine specific care needs to patients (ventilator care, bathing needs, EKG testing, continuous heart monitoring, etc) while monitoring for changes in patient conditions, and reinforcing patient education.
- Communicated with patients to ascertain feelings or needs for assistance or emotional support.
- Managed care for patients with a 12:1 ratio in an intensive care unit setting; collecting lab specimens and performing on site lab testing; urinalysis, blood glucose resting, blood draws, etc.
