Registered nurse (RN) seeking a staff position in a challenging hospital where my comprehensive nursing and practical experience can be best utilized. I gained my work experience in advanced heart failure and transplant in the busiest magnet level I trauma centers in Chicago. At Advocate Christ Medical Center I was trained to provide care on LVAD, transplant and advanced heart failure patients. Experienced in aseptic LVAD driveline and central line dressing changes.

Responsible for preparing patient the night before organ transplant/LVAD by having the necessary documents completed, showering the patient with chg, administering the proper antibiotics, providing emotional support and contribute to continuity of care once surgical patients return.

Motivated nurse licensed in multiple states along with NIHSS, ACLS and BLS certifications. Excellent pre and post surgical procedure examination skills ensure satisfied customers keep coming back for their health-care needs. Experienced in successfully completing multiple challenging travel assignments all over the country. Assisting with admitting and discharging surgical patients, collaborating with healthcare teams, and performing aseptic techniques. Harper-Morris MSN, DNPc said, "Miguel is especially skilled in building caring relationships and keeping patients alive by prioritizing severity."
