Ensure the provisions of quality emergency medical care to patients requiring emergency treatment in accordance with physician orders, hospital policy, and standard nursing practice. Perform patient assessment and nursing diagnosis. Evaluate episodic and acute response to broad classifications of physical or psychosocial issues. Manage the planning and

implementation of interventions. Coordinate patient referrals and discharge planning activities. Also responsible for performing own lab draws and running specimens in our facility

Texas Specialist Center of East Texas

TX - Lufkin, TX
2012 to 2016

Registered Nurse/Surgical Assistant

Responsibilities included assisting the physician with all in office and hospital room surgical procedures. I performed initial physical assessments and coordinated care of the patients. I educated the patients and their families on pre-operative and post-operative care. Maintained communication with the nurses as well as other physicians that were consulted on the care of our patients.

Responsibilities included

Scheduling the patients for their procedures and following up on all lab and radiological results in order to make sure that the patients met the physician's standards for them to safely undergo their scheduled procedures. I also communicated with pharmacies to make sure that the patients were picking up their prescribed medications. I also was responsible for making sure that patients were scheduled appropriately for the physician in order for him to expedite their care.

Registered Nurse/PACU Nurse

Memorial Health Systems of East OF EAST TEXAS - Lufkin, TX
2010 to 2012

Assess patients' condition after surgery has been performed. Responsible for ensuring that all vitals are within normal range, Log all findings in patients' files, answer patients' questions and ensure that they are kept comfortable. Make sure that all relevant IVs are in check, develop individualized care plans based on each patient's condition, and ensure that all nursing activities are carried out following the individual patient care plan. Monitor patients for condition change and report any changes to the doctor. Initiate patient education programs to ensure that both patients and families are educated on procedures and medications. Determine when patients are ready to be moved to their rooms. Perform intervention duties in cases of postoperative emergencies. Record sedation levels and body temperature. Manage blood and fluid transfusions and draw specimens. Ensure that the postoperative space is clean and sanitized. Change bandages and dress surgical wounds. Assist Anesthesiologist with procedures in the PACU such as nerve blocks, lumbar spinal epidural injections, and various other procedures.
