Work Experience

Travel and per Diem Contract Nurse

Surg and Rehab, and clinic

May 2020 to Present

Telemetry/ Med-Surg and Rehab, and clinic RN caring for complex patients. Duties include performing patient assessments, lab draws, wound care, foley care, medication administration, admits and discharges, communicating with a multidisciplinary team, planning and carrying out individualized plans of care for each patient, and supervision on CNA's/techs.

RN Staff Nurse

Children's Mercy Hospital

February 2020 to May 2020

Full time staff nurse assigned to help with a new multi-specialty clinic at KU Medical Center. I assisted the Clinic manager with several tasks including establishing clinic flow, setting up the huddle board and process improvement communication system, and communicating with facilities personnel. Clinical duties including pediatric blood draws, rooming patients, facilitating referrals, and communicating with a multidisciplinary team. This position was furloughed due to COVID.

RN Staff Nurse

Renal/ Telemetry - North, Kansas, US
May 2019 to June 2019

and Oct 2017 to April 2018

- Full time staff nurse on a busy renal / telemetry floor. This position cares for patients according to established plan of care. Admissions, discharges, communicating with families and physicians, supervising support staff. Renewed my ACLS certification and completed Stroke, and Telemetry Education. I was not able to stay here in 2019 due to a medical issue, and went back to the clinic.

RN

Hellman and Rosen Endocrine Associates - North, Kansas, US
April 2018 to April 2019

Registered Nurse in a fast paced Endocrine clinic associated with North Kansas City Hospital. Phone triage, patient admissions to the hospital, entering orders and consults, arranging patient testing, rooming patients including medication reconciliation and review of patient history, patient assessment, immunizations, injections including Repatha and Prolia, office procedures including ATCH stimulation tests and water deprivations tests, IV push medications, phlebotomy, blood glucose monitoring, insulin administration, wound care, required attendance to case study meetings on endocrine issues, care plan development, collaboration with a multi-disciplinary team

RN Staff Nurse

Liberty Hospital
February 2017 to April 2018

Full time staff nurse on a busy med-surg / telemetry floor. This position cares for patients according to established plan of care. Admissions, discharges, communicating with families and physicians, supervising support staff.

- LPN Tech while in ADN school. Roomed and assisted with triage of patients. Lab draws, IV starts, EKG's, medication administration, patient transport, management of store room and stocking of department supplies. Assisted with Traumas- CPR, patient care as necessary and ordered, IV starts, labs, etc. General patient care for a wide variety of patient types. Obtained ACLS certification and completed Stroke, STEMI, and Trauma Education.

School Nurse RN

Smithville School District - Smithville, MO
August 2017 to December 2017

Duties - administer medication, triage students, provide peg tube, diabetic monitoring, care plan development, monitoring of immunization and health status of students, general health screenings, vision and hearing screenings, communication and care collaboration with parents, providers, and staff. First Aid. Surveillance and reporting of weekly and monthly health issues in the student population.

School Nurse LPN

Parkhill School District - Kansas City, MO
April 2016 to May 2017

Substitute Health Room Nurse, part-time while in RN school - administer medication, triage students, provide peg tube, diabetic, and catheter care, monitor immunization and health status of students, general health screenings

LPN

Pediatric Care North - North, Kansas, US
July 2015 to April 2016

Patient check-in, vital signs, rooming for sick visits, urgent care, and well child checks. Phone triage, immunizations, prior authorizations and consult scheduling.

LPN

Med-Surg/Tele
February 2011 to June 2014

3 years total. 2 years as a Skilled Nurse on the Telemetry/ Med-Surg Unit and 1 year as a Skilled Visit nurse with Home Health. I took care of a variety of complex patients and performed patient assessments, lab draws, wound care, foley care, medication administration, admits and discharges; communicated patients care needs and testing results with physicians; and carried out individualized plans of care for each patient. I also completed training in customer service and creating the "customer experience." Trained in and used Elmer and EMR.

LPN II Duties

Northwest Health Services - Saint Joseph, MO
2009 to 2011

Check patients in, assist with minor surgeries, EKG's, suture removal, wound care, immunizations, phone triage, ran basic labs, daily use of EMR. Phone triage, immunizations, basic x-ray, basic lab testing, prior authorizations and consult scheduling.
