## Work Experience

---

### **Intensive Care Unit RN**

Ellis Medicine - Schenectady, NY  
January 2020 to Present

Prepare and administer medication (orally, per-tube, subcutaneously, intravenously) recorded prescribed medications and reported adverse reactions to medications/treatments in accordance with the policy regarding the administration of medications

- Execute IV insertion, Blood work and Arterial Blood Gas draws
- Implement Intravenous medication insertion and infusion titration
- Provide care for patients with intubation and tracheal ventilation, in-line, oral suctioning and Ambu-bag implementation and airway patency assessment
- Achieve Tube feeding insertion with tube feed infusions
- Perform head to toe, neurological, Glasgow Coma Scale assessment, tactile stimulation assessment
- Verify code cart and rapid sequence intubation kit checks and regulation on a routinely basis
- Observe behaviors and symptoms of patients and report to on-call physician
- Electrocardiogram, Arterial line, and Central Venous Pressure set up and monitoring
- Participate in Collaborative care and pharmacological consultation to provide optimal care for patients

### **Residential Nurse Supervisor, RN**

Block Institute - Brooklyn, NY  
February 2018 to January 2020

Organized the quality of record keeping, charting and meeting standards as prescribed by agency, State and Federal guidelines

- Facilitated team meetings and met with clinical staff on a weekly basis to ensure program objectives, treatment techniques and policy implementations were carried out
- Assured that the facility and services provided and adequately met the physical, social and developmental needs of all persons served in terms of protection of health, safety, comfort, well-being, civil, human and legal rights
- Monitored overall person served care to ensure needs were met as required through documented weekly observations while implementing active treatment plans
- Coordinated residential vacancies, changes in state and federal laws, rules, procedures, regulations, methods, Medicaid, Housing and Urban Development (HUD) and OPWDD

### **Care Manager, RN**

Block Institute - New York, NY  
November 2018 to May 2019

Educated community members about health issues and primary care prevention, reducing their need for emergency room visits

- Liaised between the patients, their families, and healthcare professionals to provide optimal patient health outcomes
- Participated, consulted and collaborated in formulating long term plans, goals and objectives
- Maintained documentation of patient care services while auditing patient and department records, ensuring compliance with protocols
- Identified community resources and services that will benefit clients physical well being
