Work Experience

RN Hospice Nurse

Compassus hospices - Ellijay, GA

January 2019 to Present

On call nurse that deals with end of life patients and manages symptoms for comfort as well as providing support for family and friends during such a difficult time. Also completing admissions to hospice services and evaluating level of care needed. I work closely with our medical director as well as social worker and funeral services when the time comes. Emotional support to the family is a large part of hospice. As an on call nurse I have learned to make critical decisions on my own but always have other resources available if needed.

RN Staff Nurse

Emergency department

2013 to January 2019

I have worked in 4 emergency departments providing care for a variety of patient acuity levels. I have trauma experience as well as small rural emergency department experience. I moved several times due to family, which is why I have worked in various ER settings.
