Operating Room Nurse

university medical center - Lubbock, TX

July 2014 to July 2016

Responsibilities

My role of the operating room (OR) nurse or perioperative nurse is to provide care for patients before, during and after surgery or surgical procedures. As operating room nurse my role is of patient educator, circulating nurse, and under supervision, I perform specialized nursing duties in assisting surgeons in the operating room; as scrub or sterile nurse; sets up operating room according to type of operation; assists surgeon during operative procedures; transfers patient from operating room to recovery room; and performs related duties as required.

Accomplishments

I worked on the CVS team for a little over a year. Then moved to night shift to educate myself on trauma surgery. I served as the only circulating nurse at night in a level 1 trauma center and learned to be diverse in every system from Neurology surgery to Orthopedics.

Skills Used

1. Uses established techniques in preparing for and assisting with surgical procedures; provides and sets up necessary instruments, supplies and equipment for different types of operations, according to established routines and instructions of the surgeon.
2. As scrub or sterile nurse, sets up operating room with instruments as specifically required for type of operation to be performed; arranges instruments and other articles in specified order on portable table immediately accessible to, the surgeon; anticipates surgeon's needs for instruments, sponges, sutures, suction tubes and other items and hands them to surgeon in most expeditious manner; maintains aseptic field.
3. Observes patient during surgical procedure to detect possible complications and/or breaks in sterile technique; furnishes emergency equipment and supplies to prevent fatality.
4. Manages contaminated instruments and supplies during operation procedures to prevent spread of infection,
5. As circulating nurse, places patient in prescribed position to assure access to operative field; adjusts operating table and accessory equipment as may be required; prepares operative area and drapes patient or assists surgeon with draping,
6. During operative procedure, preserves and labels operative specimens for laboratory analysis.
7. Provides special equipment such as cauteries, electro-surgical machines, diagnostic lights and other special-, apparatus and. assures same is in proper working order; manipulates such equipment, to aid in the efficiency of the surgeon and. to avoid hazards to patient.
8. Observes progress of surgery; provides additional instruments, supplies or other items as needed; provides and regulates such fluids as blood, plasma, saline and glucose solutions, cardiac and respiratory stimulants to prevent fatalities during operation,
9. After operation, may apply or assist in applying dressings ,and transferring patient, from operating room to recovery room.

10. Cleans or directs cleaning and sterilization of contaminated instruments, equipment and supplies; re-sterilizes unused supplies; cares for and stores delicate surgical instruments; cleans or assists in cleaning operating room areas and caring for and disposing of infectious and soiled linen after conclusion of each Operation.

RN

Midland Memorial Hospital - Midland, TX
September 2013 to July 2014

Responsibilities

Providing ongoing education to the patient and to the family members. A big part of getting the patient ready is alleviating anxiety.

Ensuring that the patient and the family members understand the procedure and the plan of care by encouraging them to ask questions before signing the procedural consent.

Checking their meds, vital signs, NPO status, laboratory results and history to ensure that it is safe to proceed with the planned procedure.

Accomplishments

I was able to educate my patients on procedures. Answered any question they might have and the impact of teaching is very valuable to me and insuring patient safety.

Skills Used

I as a IR nurse specialized in diagnostic radiology. From basic x-rays to complex MRIs that require the administration of dye contrast, as a team we worked to support a radiologist's diagnostic plan while accounting for patient care, comfort, and well-being.

RN

Odessa Regional Medical Center - Odessa, TX
October 2011 to February 2013

Responsibilities

Identifies patient care requirements by establishing personal rapport with potential and actual patients and other persons in a position to understand care requirements.

Establishes a compassionate environment by providing emotional, psychological, and spiritual support to patients, friends, and families.

Promotes patient's independence by establishing patient care goals; teaching patient, friends, and family to understand condition, medications, and self-care skills; answering questions.

Assures quality of care by adhering to therapeutic standards; measuring health outcomes against patient care goals and standards; making or recommending necessary adjustments; following hospital and nursing division's philosophies and standards of care set by state board of nursing, state nurse practice act, and other governing agency regulations.

Resolves patient problems and needs by utilizing multidisciplinary team strategies.

Maintains safe and clean working environment by complying with procedures, rules, and regulations; calling for assistance from health care support personnel.

Protects patients and employees by adhering to infection-control policies and protocols, medication administration and storage procedures, and controlled substance regulations.

Documents patient care services by charting in patient and department records.

Maintains continuity among nursing teams by documenting and communicating actions, irregularities, and continuing needs.

Maintains patient confidence and protects operations by keeping information confidential. title:nurse, registered

Ensures operation of equipment by completing preventive maintenance requirements; following manufacturer's instructions; troubleshooting malfunctions; calling for repairs; maintaining equipment inventories; evaluating new equipment and techniques.

Maintains nursing supplies inventory by checking stock to determine inventory level; anticipating needed supplies; placing and expediting orders for supplies; verifying receipt of supplies; using equipment and supplies as needed to accomplish job results.

Maintains professional and technical knowledge by attending educational workshops; reviewing professional publications; establishing personal networks; participating in professional societies.

Maintains a cooperative relationship among health care teams by communicating information; responding to requests; building rapport; participating in team problem-solving methods.

Accomplishments

I became relief charge nurse.
