PROFESSIONAL SUMMARY

I have had experience working as a CNA for approximately 13 years. I have worked in different types of facilities and have always loved being able to care for people who cannot take care of themselves.

SKILLS

traveled to different nursing homes and independent living homes

I provided adls, cleaning residents rooms, kitchens and bathrooms and cleaned public areas, made meals, passed out medications, gave showers, laundry, daily charting, used lifts, fed residents, dishes, activities, took vitals, made beds, refilled oxygen tanks, passed meal trays

WORK EXPERIENCE

3/2020 to 2021 **Consumer Direct, Hudson, WI, CNA**
Wisconsin

Home Health

- Accompany clients to doctors' offices or on other trips outside the home, providing transportation, assistance, and companionship.
- Administer prescribed oral medications, under the written direction of physician or as directed by home care nurse or aide, and ensure patients take their medicine.
- Care for patients by changing bed linens, washing and ironing laundry, cleaning, or assisting with their personal care.
- Check patients' pulse, temperature, and respiration.
- Entertain, converse with, or read aloud to patients to keep them mentally healthy and alert.
- Perform a variety of duties as requested by client, such as obtaining household supplies or running errands.
- Plan, purchase, prepare, or serve meals to patients or other family members, according to prescribed diets.

6/2016 to 1/2018 **ManorCare, Appleton, WI, CNA**
Appleton, Wisconsin

Cna

- Answer patient call signals, signal lights, bells, or intercom systems to determine patients' needs.
- Apply clean dressings, slings, stockings, or support bandages, under direction of nurse or physician.
- Assist nurses or physicians in the operation of medical equipment or provision of patient care.
- Change bed linens or make beds.
- Clean and sanitize patient rooms, bathrooms, examination rooms, or other patient areas.
- Collect specimens, such as urine, feces, or sputum.

- Communicate with patients to ascertain feelings or need for assistance or social and emotional support.
- Document or otherwise report observations of patient behavior, complaints, or physical symptoms to nurses.
- Exercise patients who are comatose, paralyzed, or have restricted mobility.
- Explain medical instructions to patients or family members.
- Feed patients or assist patients to eat or drink.
- Gather information from caregivers, nurses, or physicians about patient condition, treatment plans, or appropriate activities.
- Lift or assist others to lift patients to move them on or off beds, examination tables, surgical tables, or stretchers.
- Measure and record food and liquid intake or urinary and fecal output, reporting changes to medical or nursing staff.
- Observe or examine patients to detect symptoms that may require medical attention, such as bruises, open wounds, or blood in urine.
- Position or hold patients in position for surgical preparation.
- Prepare or serve food trays.
- Provide information such as directions, visiting hours, or patient status information to visitors or callers.
- Provide physical support to assist patients to perform daily living activities, such as getting out of bed, bathing, dressing, using the toilet, standing, walking, or exercising.
- Record height or weight of patients.
- Record vital signs, such as temperature, blood pressure, pulse, or respiration rate, as directed by medical or nursing staff.
- Remind patients to take medications or nutritional supplements.
- Restock patient rooms with personal hygiene items, such as towels, washcloths, soap, or toilet paper.
- Review patients' dietary restrictions, food allergies, and preferences to ensure patient receives appropriate diet.
- Set up treating or testing equipment, such as oxygen tents, portable radiograph (x-ray) equipment, or overhead irrigation bottles, as directed by a physician or nurse.
- Supply, collect, or empty bedpans.
- Transport patients to treatment units, testing units, operating rooms, or other areas, using wheelchairs, stretchers, or moveable beds.
- Transport specimens, laboratory items, or pharmacy items, ensuring proper documentation and delivery to authorized personnel.
- Turn or reposition bedridden patients.
- Undress, wash, and dress patients who are unable to do so for themselves.
- Wash, groom, shave, or drape patients to prepare them for surgery, treatment, or examination.
