EXPERIENCE

Long Term Care

Provide nursing care primarily to elderly adults in long term care facility. Primary focus on promoting the health and well-being of patients, accommodating patients' preferences, and improving the health of patients as much as possible through diet, exercise, medication, and physical therapy. Monitor health by keeping records of changes in patients' health and provide medical care to patients who need it.

Post-Acute Care

Providing skilled nursing care in rehab settings to post-acute patients. Skilled nursing care to include medications administration, IV therapy, enteral feeding tubes, tracheotomy care, wound care, and diabetes management and education. Electronic documentation and computer software use.

Hospice Care

Provide comfort care to terminally ill patients in the end of life process. Assess for clinical changes to provide optimum care during end of life. IV infusions of comfort medications administered, management of PCA pumps, tube feeding management and administration, and provide grief counseling to families.
