EDUCATION The Cochran School of Nursing, Yonkers, NY
Associates Degree Nursing 8/26/96 -6/18/98

The Catholic University of America, Washington, D.C. B.A.
Political Philosophy 9/1980 - 10/1983

SKILLS: During my first several years of nursing I had the
opportunity to be part of a medical team that worked
interdependently providing the highest level of treatments to
Burn Patients which included: Hyperbarics, Invasive
Hemodynamic Monitoring, Pre- and Postoperative

Management of tissue transplantation and a strong commitment to Pain Management. The range of client population served included newborns, adolescents, early childhood adults and geriatric patients as well. The core philosophy supported a multidisciplinary approach throughout the entire treatment of each case through intake, rounds, discharge, teaching, policy formulation and review, outreach programs and total patient care within the ICU and Medical/Surgical settings...the foundation of my career as a Nurse... Those basic knowledge and communication skills have become an integral part of my role throughout the course of my career. Following that level of patient care, I worked as a Travelling RN with extensive floating experience. I then gained experience in the Operating Room, Pre-Operative and PACU settings, where I was exposed to a myriad of medical procedures. I also expanded my scope of practice in the Home Health setting and in the Public Health sector as a Team Lead for a Covid Testing Site throughout the state of Florida. My most recent experience in direct patient care is in the pre/post operative setting.
