My career in healthcare began with me as a young adult, starting out as a CNA at the age of 18. I have worked in this field while simultaneously continuing my education, gaining both insight and experience along the way. I am currently working as an ER RN, which is a position I enjoy with a passion. Leadership skills, time management and critical thinking are imperative in this position. I am very excited about this opportunity to continue growing both professionally and personally. I am currently working on furthering my education to receive my BSN, and will strive toward my master's degree while engaged in this field that I so enjoy!

I am interested in becoming a nurse manager for an outpatient surgery center specifically. I have leadership experience, prime organizational skills, as well as a strong customer service orientation.

Authorized to work in the US for any employer
