

JACLYN SZYMANSKI, RN BSN
Jaclyns444@gmail.com
716-463-7288

I am a registered professional nurse seeking to serve our community by assisting in combating the COVID-19 pandemic. I hope to serve by administering vaccines, performing COVID-19 tests, and educating members of the community on prevention of spread guidelines, how to protect themselves, their families, and their community members by staying healthy and safe.

NURSE DUTIES -

- Safely and efficiently performs all responsibilities of a registered nurse: thorough full systems assessments, vital signs, documentation, care plan initiation and monitoring, calculating and administering medications, providing all aspects of patient-centered care, reporting changes in patient status, prioritizing, and transferring patients with life-sustaining equipment.
- Implements exceptional clinical judgement and communication skills utilizing SBAR with all members of the interdisciplinary team to provide the safest and highest quality patient care.
- Analyzes and reviews a caseload of 5 to 8 patients' medical histories, labs, orders, and test findings, and notifies providers per protocol or when necessary to ensure patient safety, care, and needs are met.

- Completes all duties as a charge nurse, assists and mentors newly-hired registered nurses and PCAs, while ensuring all patients are safely cared for, in addition to caring for my individual caseload of up to 7 patients.
- Assists physicians in emergent surgeries, treatments, ENT, hair transplantation, and dermatological procedures at the bedside.
- Responsible for full preparation of an OR, sterilized surgical equipment, taught patients pre- & post-surgical instructions, documented complete ongoing assessments, and followed up with patients after surgery to ensure a steady recovery free of complications.
- Demonstrates superior skill in advocating for patients and families by exhibiting an understanding of and sensitivity to their needs.
- Provides extraordinary patient education to empower patients and families to be successful in their plan of care, healing, and recovery process.
- Researched and effectively communicated evidence-based practices to an interdisciplinary team in order to improve the quality of healthcare provided to patients and their families.
- Supervises and mentors PCAs and nursing students to ensure high standards of care, reduced infection rates, and improved patient outcomes.
- Utilizes outstanding knowledge and clinical judgement in acute and end of life patient care
- Thoroughly reviews all discharge instructions to patients to ensure understanding and success in following up with their plan of care.
- Enthusiastically provides compassionate, empathetic, and holistic patient-centered care to all individuals across the lifespan.
- Committed to the professional and ethical conduct of a registered nurse and the HIPAA confidentiality and privacy law.
- Dedicated to always leading with care in providing exceptional service, value, and dignity for all patients and their families.
