Work Experience

Travel PCU RN

Banner Del Webb Hospital - Phoenix, AZ

February 2021 to Present

As a PCU RN, I care for the needs of critically ill patients that are on the border of ICU status. I am very attentive to my patients and do my best to perform excellent patient care. Monitoring critical vital signs, running drips and watching for key changes is crucial to my role as a PCU RN. Every hospital I have worked for so far in my travel ventures have asked me to become part of their staff which I believe is related to my work ethic and ability to develop strong relationships wherever I am.

Travel PCU RN

Evergreen Hospital and Medical Center - Kirkland, WA

November 2020 to February 2021

During these travel assignments, I was responsible for Covid+ and non-Covid patients on the Progressive Care Unit. Monitoring critical vital signs and initiating life-saving interventions as needed. Caring for a variety of patients with cardiac, stroke and all system needs.

Travel PCU RN

Nyack Montefiore Hospital - Nyack, NY

April 2020 to June 2020

During these travel assignments, I was responsible for Covid+ and non-Covid patients on the Progressive Care Unit. Monitoring critical vital signs and initiating life-saving interventions as needed. Caring for a variety of patients with cardiac, stroke and all system needs. A newly learned skill for me was taking care of trach-vented patients in New York. I was also asked to be a task RN in the ICU several times in Arizona.

PCU RN

Central Washington Hospital - Wenatchee, WA

September 2017 to April 2020

Responsible for Pre/Post-open heart surgery patients, post-sheath, Heart failure, Stroke, Renal failure, Respiratory failure, Liver failure, GI bleeds, Alcohol withdrawal, Chest tubes, and all other patients that needed critical monitoring and assessments. IV placements and care, Central Line care, cardiac rhythm analysis and treatment.

Telemetry

Highline Medical Center - Burien, WA
August 2016 to September 2017

Responsible for patients with preexisting heart conditions, elderly, diabetic, obese and those transferred out of the ICU and ER who needed special cardiac monitoring, assessment and treatment. My role included cardiac monitoring for visual interpretation of changes in rhythm and initiation of treatment as needed.

Education

Bachelor of Science in Nursing
