**OBJECTIVE**

I have been in RN for over 30 years, over 25 years in Critical Care area. My past certifications include CCRN, FCCS, ACLS and BLS. Prior certifications include TNCC and PALS. I have worked at small community hospitals to large teaching hospitals and large county hospitals. While working in SICU at Holmes Regional in 2007, the staff chose me to receive the "Eyes On Award". This award is based on clinical strength, relationship skills, being a team player and leadership qualities. I have enjoyed working in areas of care where you have to use critical thinking skills and you have to frequently re-evaluate your situation. I have been a relief charge nurse in multiple units in my career. I also have done multiple RRT's at each of the hospitals I have worked while being in charge. I have been recently doing Case Management for over 5 years but have returned to the MICU at Cape Canaveral Hospital since November 2020. With the experience of 25 years of critical care and my recent experience of case management I feel I will be a great asset to any hospital especially with the current situation in the country with the pandemic and the need for critical care nursing.
