Authorized to work in the US for any employer

## Work Experience

---

### **Specimen Processor II**

Aspirus - Wausau, WI

2018 to Present

At Aspirus, I work as a specimen processor and receptionist. I receive samples sent from all over the hospitals and connected clinics. I am also responsible for running and resulting kit tests such as flu, strep, mono, BLS, pregnancy, and Covid tests. Most often I work as a specimen processor. In this area, we receive samples from all the Aspirus hospitals, clinics, and affiliated medical facilities throughout the state. We are responsible for entering every sample into our computer system, entering orders, pour off samples, adding additives, and distributing samples to the appropriate departments for processing and testing.

### **Plasma Technician**

BioLife Plasma Services - Wausau, WI

2017 to 2019

At Biolife I was a phlebotomist. Daily, I set up plasmapheresis machines and spiked solutions. I was required to run a section of six donors. While running a section I was required to check, reset, and sanitize the machines between each donor. I performed a venipuncture and connected each donor to the machine while following specific procedures. I was also a trainer at this facility. A constant priority was to maintain donor safety.

### **Bar Manager/Bartender**

GREENWOOD HILLS COUNTRY CLUB - Wausau, WI

2016 to 2017

I started here as a bartender/server, then I was promoted Banquet Lead, and lastly, to bar manager. I did all the scheduling of the bar, event, and pool staff. I did event tours, assist with the scheduling and organization of the event, and set up and ran events. I was responsible for inventory and ordering for the two bars at the facility, the pool area, and the golf course. I am capable of training and overseeing staff.

### **CNA - Certified Nursing Assistant**

COLONIAL CENTER - Colby, WI

2015 to 2016

As a CNA, I helped my residents with their ADL's (Activities of Daily Living). I documented food intakes and outputs every shift. I took orders from Nurses and helped other CNA's with their duties. I enjoyed assisting the residents and taking responsibility for their care and wellbeing.
