Work Experience

ICU RN

Santa Rosa Memorial Hospital - Santa Rosa, CA

May 2021 to Present

- Provide patient care, performed assessments, and interventions at a 24 bed ICU unit for trauma and call post-operative cardiac, and neuro patients.
- Assessed patients' condition, notified physicians of clinical changes as well as prepared and implemented patient care plans.
- Monitored vital signs, adequacy of ventilation, and levels of consciousness and pain.
- Administered medications as determined by the patient's condition (IV, Sub-Q, etc.)
- Communicated the patient's condition to family members in a compassionate and non-technical manner.

ER RN

Presbyterian Kaseman Hospital

May 2018 to Present

- Provided initial assessment and safe care to stabilize patients in a fast-paced 24 bed Emergency Department.
- Assisted in the care of cardiac arrests, stroke codes, and conscious sedations.
- Provided care to people across the lifespan with different conditions from infants, children, pregnant women, and the elderly.
- Independently maintained patients requiring critical IV medications such as Cardizem, Dopamine, Insulin, Nitroglycerin and Adenosine.

- Constantly communicated and collaborated with physicians and other healthcare professionals to ensure optimal care was given to patients in a timely manner.
- Effective use of verbal de-escalation techniques and therapeutic communication to behavioral health patients.

ER RN

Santa Rosa Memorial Hospital - Santa Rosa, CA
May 2019 to February 2021

- In depth exposure to care and management of Level II trauma patients arriving by ground and air.
- Prioritization of life saving interventions in Code Trauma, Trauma Alert and Code Critical patients.
- Effective delegation of tasks in a multi-team approach to caring for the critically ill.
- Perfected across the room assessment skills, including a proactive work ethic to initiate treatment and care in lower acuity patients.
- Deeper understanding of the hospital systems as a whole, including collaboration of ancillary staff, OR and Cath lab transferral, Inpatient admitting, and safe transport of critical patients to appropriate units.
- Skill sets to understand and adapt to disaster relief protocols in time of natural disaster and hospital overflow.
