Work Experience

LPN (Licensed Practical Nurse)

Saint Patrick's Hospital - Missoula, MT

September 2020 to Present

Assist providers with ultra sound guided trigger point muscle injections, administration of injections to patients, scheduling procedures & obtaining a health history. Verifying vaccination and medical history. Medical product ordering, medical lab entering and documentation. Maintaining a productive schedule and balancing provider work loads through a collaborative effort. Multitasking responses to virtual patient messages and in person patient needs.

LPN Manager

Community Medical Services - Missoula, MT

October 2018 to September 2020

Manage day to day operations between five separate clinics. Monitor nursing schedules, complete internal DEA audits, problem solving and creative thinking. Efficient computer knowledge and program usage. Dispense medication to patients while collaborating with provider care. Delegate tasks between nursing staff. Working as a team to best treat each individual patient. Performed blood draws, UA specimen collection and EKG's.

LPN (Licensed Practical Nurse)

Community Medical Center - Missoula, MT

February 2018 to December 2018

As an LPN I do a variety of duties. For example; I room individual patients, use online computer charting and documentation, take vitals and assist providers in procedures. I also perform point of care services like blood draws, EKG's, remove sutures and receive samples, then prepare them for the lab as well as giving injections/medications to patients. Each day we make patient phone calls and follow treatment plans provided by the providers. We send referrals and schedule appointments for patients. We have morning and night procedures we follow and document daily that they are done. Team collaboration is a huge part of the day as well, having open communication between peers helps keep the flow of the work day. In addition I also delegate tasks and train new hires. Time management is also a critical part of the day. Over all, this job has made me a well rounded nurse who is confident in her abilities and always open to learn new things.

Licensed Vocational Nurse (LVN)

Maxim Healthcare Group - Palm Desert, CA
March 2016 to December 2018

Therapeutic patient care, transcribing MD orders, efficient documentation, team collaboration, and patient education. My confidence with patients has been increased and influenced by building stronger nursing skills from advice, training, and practice with nurses who already have strong skills. My skill set has greatly benefited and will continue to grow everyday with the longer I work in the nursing field. Blood draws, universal precautions, therapeutic patient-nurse relationship, infection control, input and output, medication administration, injections, CPR/First Aide, advanced directives, patient assessment, and glucose monitoring.

LVN

Desert Comprehensive Treatment Center - Palm Springs, CA
August 2016 to January 2017

Medication administration, proper documentation skills, computer skills, assessment skills, writing and transcribing orders, appropriate nurse-patient relationship skills, time management, following universal precautions. As a nurse we also administered TB shots and performed RPR's. Efficient team player, being open minded while having proficient collaborating skills to provide effective patient care.

Education

California Nurses Educational Institute - Palm Springs, CA
