Work Experience

RN

Watertown Regional Medical Center - Watertown, WI

August 2020 to Present

Multi specialty CRC. Trained to all departments in the hospital.

RN

Dean SSM

August 2012 to Present

I have most recently been managing oncology patients with supplemental infusions and central lines in a clinical setting that I set up and manage independently. I was given this opportunity as I am charge nurse at a local clinic that services family medicine, internal medicine, and other supplemental nursing needs as they present to our clinic.

This opportunity was afforded to me because of my responsibility and my knowledge and skill level. I am extremely happy with this role and function as it allows overflow access for patients at a closer distance to their home.
