Dialysis RN

CoxHealth
February 2016 to September 2016

As an acute dialysis RN I talk to the dialysis patient and/or his family, explains the dialysis procedure, answers their questions and addresses any concerns. I prepares the dialysate solution, checks the dialysis port and accesses the site, sets the limits on the dialysis machinery, obtains permission for the procedure, administers any medications and identifies the patient correctly. I also watch the patients carefully for complications during the procedure, ensures that the proper amount of solution infuses and keeps records of the procedure. I work with the Doctor and care team.
