Professional Experience:

Registered Nurse ER

Fraser Health

Surrey Memorial Hospital

April 2013 – current

- Recognized and reported abnormal blood work, diagnostic results, and vital signs to physician
- Monitored patient condition, including interpreting, and tracking ECG readings, identifying irregular telemetry readings, and updating team members on changes in stability or acuity
- Provided direct patient care, stabilized patients, and determined next course of action
- Documented all assessments, interventions and patient responses using appropriate emergency records including ENAR, Focused/Short Stay Record, Best Possible Med History on Med Reconciliation Form, and other related nursing flow sheets
- Triage patients and assign CTAS scores
- Management of advanced airways
- Assisted with CVC insertion and obtained blood samples from CVC
- Initiated appropriate isolation precautions when required

Registered Nurse

Vancouver Coastal Health

Vancouver City Jail

December 2010 - April 2013

- Performed triage on all incoming patients and determined severity of injuries and illnesses
- Conferred with physicians to discuss diagnoses and device well-coordinated treatment approaches

- Delivered outstanding care to patients with various diagnoses and managed care from treatment initiation through completion
- Facilitated therapeutic communication, conflict resolution and crisis intervention by redirecting negative behaviors and helping patients regain or improve coping abilities to prevent further disabilities
- Taught patients how to improve lifestyle choices, dramatically reducing chance of symptom re-occurrence
- Advised patients and caregivers of proper wound management, discharge plan objectives, safe medication/drug use (ie. using safe clean needles) and disease management (ie. taking ARVs as prescribed)
- Kept optimal supply levels in treatment rooms, triage, and other areas to meet typical patient loads

Registered Nurse

Peace Health

St. Joseph Medical Center

May 2011-July 2011

- Provided patient care to patients from ER and OR
- Performed assessments, provided intravenous therapy, complex wound care, monitored various drainage devices
- Collaborated daily with physicians and health care team to achieve optimum patient care
- Educated patients regarding their medications, procedures, and treatments
- Responsible for post-op teaching and care for surgical, orthopedic including joint replacement patients and neurosurgical patients
- Developed special patient rapport required to care for chronic and critically ill patients
