Nursing RN with telemetry experience seeking career transition to use learned skills and knowledge to become a member of your team to assist your agency in a nursing role. I am recently graduated from RN-BSN program at UIC. I like nursing because it is a profession that never stops giving. A nurse learns new things every day, and the opportunity for growth is almost unlimited. For that reason, my goal is to go further and keep growing in this profession. I can work on multiple projects at the same time, also devoted to get the job done effectively in a timely manner. Communicates well with others on all levels. I am confident that my skills are well-aligned with the role, and that I would be an excellent fit for the job.
