### SKILLS

\* Communication - I possess the required skills to communicate important information in a professional and timely manner; from patient communication to care coordination with physicians, I am able to effectively communicate with my team. I am also able to communicate and express compassion towards my patients and their families, which is a necessity in any given situation.

\* Critical thinking skills - When emergent situations arise, it is important to be able to take the results of your thorough assessment, along with subjective information/symptoms, to make decisions quickly and accurately to take the next step in the patient's plan of care. I possess the skills to perform an accurate focused assessment to gather the information I need to collaborate with other members of the healthcare team.

\* Basic necessary nursing skills, including, but not limited to: Thorough and accurate physical assessment, accurate vital sign assessment, thorough documentation, lab draws via peripheral venipuncture, as well as central lines/PICC lines; urinary analysis specimen collection via clean catch technique and from a catheter, nephrostomy tube cares, catheter changes/cares, IV/PICC dressing changes, wound dressing changes, IV medication administration, nutrition/diet education, medication education, and many more.
