WHO I KNOW

TODD PEEBLES, MD (NEUROINTERVENTIONAL RADIOLOGIST)

I have worked closely with Dr Peebles for over 10 years; in Specials and at the Radiology Associates of the Fox Valley clinic in Neenah. He has high expectations of those who work with him and I strive to anticipate the needs of the patient and the situation in procedures.

KRISTINA ALMANZA, RN (LEAD- THEDACARE NEENAH SPECIAL PROCEDURES)

I have known Kristina about 9 years since she started working in Special Procedures. She can attest to my skill level with peri-procedure and intra procedure tasks. Willing to change my job when a critical staffing need arose recently, she can verify my willingness to help colleagues in need and care for patients undergoing Cardiac Cath Lab and Interventional Radiology procedures.

WHY I WANT TO BE HERE

I am seeking a flexible work-contract setting. I have skills in highly critical areas of nursing and I'm comfortable and confident in performing necessary skills when the situation arises. I can value the trade-off from having a long-term job to having a higher-paid hourly contract position. I am adaptable and I can get along with a wide variety of people.

HOW I CAN ADD VALUE

Motivated to learn and always excited at a challenge, I am a sharp nurse with attention to detail. I pride myself in doing a very good job and I strive for perfection in patient care. I am a natural-born leader, self-driven and I am always looking to ways to improve or be doing something. I find it hard to sit idly and this leads me to be a good co-worker and team player.

WHERE I'VE BEEN

ThedaCare Regional Medical Center- Neenah (TCN), ICU RN, March 2019-current

As the region's Comprehensive Stroke Center and Level II Trauma Facility, I got the opportunity to care for one to three medically complex patients in a Medical ICU. Front line RN during the COVID-19 pandemic, including caring for a very medically fragile patient whom was flown to Froedert for ECMO. Display of resilience and adaptability in very uncertain times. Relentless pursuit to prioritize the best interest of the patients I care for.

TCN Specials Procedure Department - RN, July 2010-current

Care for patients undergoing Interventional Radiology and Cardiac Cath Lab Procedures. Administer moderate sedation. Closely Monitor patients and use ACLS and BLS skills.

Radiology Associates of the Fox Valley, Neenah, WI - RN, November 2014-March 2019

Self-starter; devised the system for and managed inventory. Phone triage, rooming, procedure coordination, and caring for patients undergoing office procedures.

Appleton Medical Center, Inpatient Oncology - RN, September 2009-July 2010

Care for up to six complex inpatient oncology patients. These patients were often going for procedures, receiving chemo, had drains and tubes, and most had central lines. Care for dying patients and their families.

Theda Clark Medical Center, Neenah, WI- Cardiac/Ortho

Registered Nurse/Graduate Nurse/Nurse Extern, June 2008- September 2009
