RN COVID SCREENER 01/17/2021 to Current

RN COVID-19 Screener in secondary screening and evaluation of patients identified at the primary screening area needing further evaluation.

- Documents in CPRS (electronic medical record) any additional evaluation performed at secondary screening to include a temperature and O2 saturation, and any other vital signs required/performed.
- Performs nasal swab testing of symptomatic, asymptomatic, and pre procedure patients presenting to the external COVID operations area and assist with patient disposition. Using the Secondary Screening Protocol or COVID Testing Requesting Note.
- Transports specimens to lab for testing and communicates with providers and interdisciplinary teams.
- Communicates with primary screeners, COVID-19 ED staff, admissions and any other medical services concerning incoming patients, their disposition needs and requirements.
- Helps to train any new staff assigned to the external COVID- 19 operations area and ensure all requirements are met before new personnel begin testing.
