## EXPERIENCE

---

### REGISTERED NURSE

#### Mercy Hospital Springfield (1991 - Present)

- Observed surgical procedures to closely monitor patient and quickly assist physician with potential complications or additional needs
- Maintained aseptic environment to prevent patient infections or other unwanted outcomes
- Accessed patient medical history, current medications and pre-procedure instructions to confirm adherence and respond to questions
- Monitored unexpected patient events, interactions or outcomes and recorded incident report in certain situations
- Sterilized and arranged operating equipment and instruments to prepare room for surgery
- Supported successful administration of care plans by communicating with cross-functional teams
- Reported issues or unusual occurrences to charge personnel to act as patient advocate
- Responded to emergency situations
- Built relationships with pre- and post-surgical patients with compassion and positive attitude
- Assisted with patient surgery preparation by administering proper medication, monitoring patients' conditions and charting abnormalities
- Analyzed patient chart data and identification to verify accurate information
- Transported patients to holding area to prepare for operating procedures
- Minimized infections using proper skin prep products and procedure

Charge nurse responsibilities: assigning staff to surgical procedures, maintaining quality assurance checklist for equipment, scheduling procedures and verifying correct instruments and equipment is available, communicating with surgeons about room availability, monitoring trauma rooms and emergency department for possible surgical cases
