Work Experience

Nurse Practitioner

VCU Health CMH-Chase City Primary Care Center

October 2018 to Present

Provided comprehensive primary care services to patients in Western Mecklenburg County.

- Worked autonomously and provided full physicals, follow up appointments and acute visits (common colds, UTIs, rashes, allergies, headaches, and acute injuries).
- Perform telemedicine visits utilizing audio/visual technology.
- Evaluated and provided assessment, diagnostic and medical management of chronic diseases including diabetes, obesity, hypertension and hyperlipidemia.
- Obtained health histories, evaluated lab tests, and collaborated with medical staff in the diagnosis and management for patients in an outpatient setting.
- Provided education for patients about health promotion, disease prevention, medications and birth control methods.
- Performed procedures such as: pap smears, suture removals, I&Ds, bursitis aspiration, COVID-19 testing, and nail avulsions.
- Treated STDs among a diverse, urban population and counseled on STD prevention and reinfection.

Med/Surg Nurse

HealthTrust Workforce Solutions

October 2015 to April 2018

Provided patient care as a Per Diem nurse in Florida and Virginia HCA hospitals.

Responsibilities required me to care for 5-6 patients and make clinical assessments, chart, and report any change in the patient's status.

Performed assessments, monitored post op patients from general surgery and ortho, provided IV therapy, complex wound care and monitored various drainage devices.

Collaborated with doctors, nurses, and other health care team members to achieve optimum patient care.

Assessment of patient's signs and symptoms, which required physiologic and psychosocial changes in patient's condition.

Documented patient's plan of care using nursing diagnoses, expected patient outcomes and selected nursing interventions.

Clinical Nurse

Florida Dept. of Health at Okaloosa County
March 2016 to March 2017

Provided patient care in Ryan White program as a nursing program specialist and case manager. Exceptional experience with administrating immunizations, medications, performing venipuncture and obtaining specimens for laboratory testing.

Obtained health histories, conduct risk assessments related to domestic violence, HIV, TB exposure, nursing assessment and prepare client for examinations.

Orders, interprets, and evaluates diagnostic tests to manage chronic diseases (HIV, diabetes, hypertension, COPD, hepatitis, renal failure etc.) and STDs to identify and assess patient's condition in coordination with physician.

Educates and instructs patients on health education, medication adherence, disease transmission prevention and develops care plans.

Effectively served as a case manager for patients and worked in collaboration with the physician to provide continuity of care by monitoring referrals to other medical specialties.

Participates in quality improvement, cross training and staff development activities to assess program effectiveness and provide ongoing assessment of community resources.

VCU Community Memorial Hospital- Med/Surg/Tele
August 2014 to August 2015

- Exceptional experience performing general nursing responsibilities including head to toe assessments, medication administration, admissions, discharges, vital signs, carrying out orders and cardiac telemetry monitoring.

- Adequately administered oxygen, IV fluids and blood transfusions to patients in need.

- Effective experience with being able to adapt to changes and become flexible in difficult situations.

- Able to proficiently administer oral medications and educate patients about the need for the specific medication.

- Successfully collaborated with physicians and nursing staff to provide effective care and develop treatment plans.

- Able to use critical thinking skills in highly stressful situations when patients' status changes.

- Effectively placing patient on cardiac telemetry monitor.

- Conducted EKGs on patients when chest pain was experienced or a change in status was noted.

- Educated patients regarding their medical diagnosis and symptoms presented.

Family Foot Clinic

August 2005 to August 2015

Provided podiatry care to 20-25 patients daily in a private office. Assisted the podiatrist with routine foot care, diabetic foot care, wart removals, ingrown toenails, wound care, lower extremity surgery and toenail fungus.

Conducted and organized office meetings by researching and presenting topics related to podiatry.

Reviewed and interpreted lab reports and prepared care plans.

Assisted in surgeries such as nail avulsions, bone spurs and wart removals.

Trained and welcomed new employees into the podiatry field.

Liaison between the insurance company, the office and the patient's of Family Foot Clinic

Collected substantial amounts of money in bad debt from previously denied Medicaid payments through persistent follow up. Provided Medicaid with the correct documentation needed to reverse prior denial decisions.

Built mutually respectful relationships with third party payers, PPOs, Medicare, Medicaid and independent commercial carriers.
