+1 773 251 1649

I am a hardworking, reliable, and genuine registered nurse dedicated to patient centered care. I have had the opportunity to professionally develop into a nurse, enhancing skills such as critical thinking, time management, teamwork, and patient education while working in high acuity, fast paced settings. I have worked with a variety of complex patients such as patients with heart failure, dialysis patients, labor and delivery patients, surgical patients, and post surgical patients including OB PACU. I am BLS and ACLS certified. By working on the med surg and OB units, I have further developed how to respond and be flexible to many different types of patients, families, and situations. I have been commended for advocating for my patients, ability to act independently as well as collaborate, thinking critically, and my desire to learn.

Authorized to work in the US for any employer
