Authorized to work in the US for any employer

Work Experience

LPN

Harmony House - Waterloo, IA

May 2018 to Present

Working as an LPN since 2012 I have had the luxury of working for some good healthcare facilities with all their own situations and knowledge building census. I started out my nursing career in the Hospital and specifically the ED which I feel has prepared me for many different roles as an LPN. I have worked in corrections and mental health , learning what areas I like to specialize in and what areas of healthcare I would just like to know about. Geriatrics and Dementia is where most of my healthcare experience lies and where I have gained the most experience in nursing, now I am currently working in a facility where the setup is like a LTC home but the resident care is far from just daily monitoring of elderly and dementia residents. At harmony house I get a variety, head injury unit, Intensive care (where most of these residents are vent dependent, or use feeding tubes or both, and then the Developmentally impaired unit where most of this units residents have been born with a debilitating form of MR or developmental delays. I have been MANDT trained, IV certified, and have taken the LPN supervisory course.
