

katie warne

The most understanding and caring Nurse.

North English, IA

-Email me on Indeed: <http://www.indeed.com/r/katie-warne/6c8555fcd7fad621>

I am currently employed at a long term care facility in North English Iowa. My experience has been being a charge nurse, passing medications, point click here charting, wound care, end of life care, and all other aspects of geriatric care. Providing education to residents and their family members on Several different Situations they may have to deal with, time management skills, delegating tasks for CNAs and other staff. My sense of humor has been beneficial in every situation I come across, my energy level is upbeat and I love to work. I come from a Family of health care providers from doctors to nurses to dentists, This has allowed me to be exposed to the healthcare system for my entire life In one way or another. My sole purpose in life is to take care of people and make their experience as easy and pleasant as possible.

Authorized to work in the US for any employer

Work Experience

lpn

Chatham Oaks

October 2014 to October 2021

Chatham oaks as an LPN Was a phenomenal experience, I started in October of 2014 My job is primarily passing meds, and giving injections although I provide counseling and and several different coping skills to help residents deal with their illness. When I have free time I spend time with the residents one on one. I make it a priority to get to know them on admission.The residents I take care of are of the ages of 18 and up, and I can relate to each and every one of them individually. My upbeat personality helps me do my job well wherever I work.

Clinic Nurse/LPN

Dr. Burns - Iowa City, IA

March 2006 to April 2008

My job consisted of making sure patients are prepared to see the doctor, getting their vitals a small bit of what's going on and preparing them for the visit, when the doctor arrived I was required to take notes and assist the doctor, in doing pap smears, blood draws, and even small lab tests that we could perform in the office, making sure the doctor stayed on a timely manner as to get the patients in the waiting room scene as quickly as possible. I provided vaccinations to children as well as adults, I've obtained prior authorizations for medication. Due to this doctor being a family doctor, Ive had the pleasure to deal with several different age groups during my employment, which has given me the courage and the confidence to know how to blend in and communicate with basically anyone.
