Summary

My name is Vivein and I am a student at Goodwin University. I am studying to become a Nurse. During my free time, I love to listen to songs, watch TV, go on a walk, write in my diary, taking pictures, and play card games. I am pretty good at graphic designs- making logos; making suitable choices for colors, fonts, photographs, layouts. I have a little experience in personal finance- credit cards, insurance. I also have a little bit of experience in food services as well. But, my main skill is Photography. I love taking pictures of foods, nature, and with people. I always had an interest in photographing. When I was in high school I took some of these classes so that's how I had experienced all of these. In my freshmen year of high school, I took Graphic Designs. In my class, we used photoshop express and we learned how to make logos, labels and play around with almost everything in photoshop. In sophomore year I took food productions. In this class, we learned about sanitization, and then we usually cook around once a week. Lastly, in my senior year of high school, I took Pottery. In pottery, it was a full-year class so the first semester we built stuff with clay, and the second semester we built stuff like dream catchers, scrapbooks, and all sorts of things. My main job/career that I am going towards is Nursing. This is my dream job and I always had an interest in working in the medical field ever since I was a little kid. Even though I am currently enrolled at Goodwin I will still like to take job positions that are available. If there are any job openings available please feel free to contact me.
