## NURSING EXPERIENCE

---

**USAISR, DB610-02 Expanded Position** San Antonio, TX February 2016-Present

- Care of patients with burns, TENS, Steven Johnson Syndrome, Necrotizing fasciitis and Calciphylaxis
- Wound care, showers for burns
- Provides comprehensive and highly specialized critical care professional nursing to adults and geriatric patients who have sustained burn injuries involving up to 100% of total body surface area.
- Performs skin cleansing and debridement, continual assessment, planning and evaluation of care
- Development of a comprehensive plan of care and the recognition of physiological and behavioral changes and their significance to patient welfare
- Requirements include knowledge of psychosocial therapy and techniques to support and motivate burn patient and family; ability to interpret deviation in selected laboratory tests and procedures; Advanced Burn Life Support and Advanced Cardiac Life Support.
- Decision support tool
- Care involves administering medications to include research drugs and operating special equipment such as CRRT machines, ECMO, cardiac monitors and air fluidized beds
- Coordinating care between attending, burn surgeon, fellows, residents, PT/OT, Respiratory Therapy, SW, Case management, families and other specialty consulted staff
- Trained in CRRT and ECMO supportive machines, preceptor for new burn ICU staff and for CRRT.
- Charge nurse role weekly
- During the Covid 19 pandemic we opened our BICU to take care of non burn patients. We admitted some of the sickest Covid patients to our unit including patients that required ECMO, CRRT and ventilator support. Some patients also required seraph filters to be placed. These patients were very unstable requiring multiple vasopressors and ECMO circuit changes, in constant states of septic and hypovolemic shock.

**Medtrust, San Antonio, TX** February 2015-February 2016  
Registered Nurse, Burn ICU

- Care of patients with TENS, Steven Johnson Syndrome and Calciphylaxis
- Wound care, showers for burns
