## EXPERIENCE

### Registered Nurse, BSN, RN

Advocate Condell Medical Center | Libertyville, IL | August 2018 – Present

- » Worked in the Stepdown ICU unit with high acuity patients, including post-op open hearts, post VATs, post cardiac cath, postop Watchman, and Level 1 traumas, as well as tracheostomy-ventilator dependent patients.
- » Responsible for the care of other critically ill patients, including alcohol withdrawal, drug overdose, septic shock, respiratory failure, and medically declining patients needing emergent dialysis.
- » Provided care and continuous monitoring for patients on non-titratable cardiac drips and for patients with ordered neurological checks every 2 hours.
- » Cared for COVID patients who needed to be on continuous BiPap, on the maximum oxygen setting. Monitored these patients closely due to high likelihood for intubation.
- » During the initial COVID surge, was cross-trained as an ICU nurse to take care of intubated patients who were sedated, paralyzed, and routinely prone. Trained to administer paralytics, analgesics, and sedating IV medications to COVID patients.

### Registered Nurse, BSN, RN

Glen Oaks Nursing and Rehabilitation Center | Northbrook, IL | April 2015 – August 2018

- » Monitored and documented residents' health statuses, completed required assessments for each resident upon move-in & readmission after a leave of absence.
- » Charge nurse for dementia and psych units with responsibilities that included administration of medication to an average of 60 residents; supervising, directing, and assisting the CNA staff; admitting or discharging residents from the facility; notifying doctors and NPs of any changes regarding the residents; and maintaining accurate and concise patient records.
- » Med nurse for skilled unit responsible for administration of medication via different routes: PO or G-Tubes, or IVs for antibiotic treatments.
- » Vent nurse for trach vent patients in skilled unit responsible for administration of nebulization, trach care and vent set-up and monitoring.
- » Treatment nurse responsible for wound assessment and administration of wound treatment.

### Registered Nurse, BSN, RN

Cagayan De Oro Medical Center | Cagayan de Oro City, Philippines | July 2005 – July 2007 | July 2011- January 2015

- » Provide nursing care to patients in intensive care unit with cardiac, neurologic, respiratory and other serious medical condition. Monitor vital signs and provide bedside care for patients on cardiac monitor and on vent with ET or trach.
- » Corresponded with and took orders from physicians, updated orders in physician order sheets and carried out physician orders, and notified physician and family of any status changes.
- » Administer medications via oral, intramuscular, intravenous, and subcutaneous route through nasogastric/gastrostomy tube and suppository insertion per rectum or vagina as ordered. Observe and note reaction of patient to treatment/medications.
- » Check equipment like mechanical ventilator, syringe pump, infusion pump, pulse oximeter frequently to ensure proper function and adequate operation of its alarm systems.

### Registered Nurse, BSN, RN

Bongcas Holy Child Hospital | Maramag, Bukidnon, Philippines | November 2014 – November 2015

- » Admits and renders immediate nursing care to patients for surgery or post-operative cases and to patients with medical conditions. Charge nurse, medication and bedside nurse according to assignment, monitor patient's vital signs and assess for any abnormalities.
- » Administers medications in all routes per physician's order and observes patient's reaction to medications or other treatments. Feed patients per NGT or PEG tubes.
- » Prepares and assists physicians with diagnostic and therapeutic procedures done at bedside like dressing, debridement, NGT insertion, I and D, ET etc.
- » Perform nursing clinical procedures like catheterization, IV insertion/infusion, blood transfusion, gastric lavage and gavage, nebulization, wound dressing, insertion, hemoglucose testing, ECG taking, Oxygen administration, suctioning, ABG extraction, etc. Trained and Performs CPR.
