Work Experience

Registered Nurse, Neonatal Intensive Care Unit, November 2016- December 2021
Holy Cross Hospital, 1500 Forest Glen Road, Silver Spring, Maryland 20910

- Routinely assigned as a shift resource nurse, responsible for leading the shift huddle and assigning tasks, communicating patient status and serving as resource to less experienced nurses.
- Admits and stabilizes new patients of varying gestational ages.
- Communicates with physicians, respiratory therapists, pharmacist, blood bank and other team members to facilitate infant care.
- Demonstrates clinical skills including airway management, IV insertion and management, medication administration, blood transfusions, lab draws, insertion and maintenance of nasogastric and orogastric tubes.
- Assists physicians and nurse practitioners with medical and surgical procedures including circumcision, eye exams, intubation, lumbar puncture, central line/arterial line insertion.
- Works with families and all team members to provide family-centered care. Frequently communicates with family members to give real-time status updates, translates complex medical terminology into audience appropriate language and coaches them on how to care for their infant during their NICU stay and after discharge.
- Facilitates patient discharge and provides family education needed to independently and confidently care for their infant at home.

Registered Nurse, Neonatal Intensive Care Unit, April 2018- March 2020
St. Agnes Hospital, 3407 Wilkens Ave, #400, Baltimore, MD 2122

- Attended high risk deliveries with nurse practitioner and neonatologist and admitted and stabilized patients of varying gestational ages.
- Communicates with all team members to facilitate comprehensive infant care.
- Proficient in clinical skills including management of airways, IV insertion and management, medication administration, blood transfusions, lab draws, insertion and maintenance of nasogastric and orogastric tubes.
- Worked with families and all team members to provide family-centered care. Frequently communicates with family members to give real-time updates, translates complex medical terminology into audience appropriate language and coaches them on how to care for their infant during their NICU stay and after discharge.
