---

### WORK EXPERIENCE

**RN - Post Trauma – Ortho, Regional One Health, Memphis, TN**

05/2021 – Present

- Provide professional nursing care to patients within assigned areas utilizing the nursing process to assess, plan, implement and evaluate patients.
- Provide nursing care according to medical regimen and the nursing interventions appropriate for the patients' conditions.
- Initiate assessment based on the patient's presenting problems or needs, the physician's medical diagnosis and the functional health framework upon visit.
- Collect key information from patient, family, laboratory, and other medical reports. Ensures that all consents necessary for treatment/procedure have been signed and that all prescribed identification procedures have been carried out.
- Determine nursing diagnosis and priorities for care with special consideration given to patient teaching, discharge planning, and the growth and development needs of the patient.
- Determine which standards of care and practice apply to the patient.
- Document assessment, including nursing diagnoses or other clinical judgments.
- Demonstrate knowledge, technical, interpersonal, and critical thinking skills to provide care, manage clinical competency and meet age-specific patient needs within the unit.
- Complete ongoing assessments according to outpatient and nursing policy and/or as determined by patient condition.
- Perform therapeutic nursing interventions, as ordered by the Physician.
- Provide teaching to patient/family in the care of disease/condition. Develops and implements patient teaching outlines including objectives, content, teaching strategies and evaluation of patient progress.
- Maintain patient medical records; documents patient status and care given; performs charting duties; records activities and observations. Utilizes patient computer systems to enter and retrieve data.
