LPN and RN

Saint Luke's Hospital - Chesterfield, MO

December 2016 to December 2019

Administer prescribed medications or start intravenous fluids, noting times and amounts on patients' charts.

Observe patients, charting and reporting changes in patients' conditions, such as adverse reactions to medication or treatment, and taking any necessary action.

Provide basic patient care or treatments, such as taking temperatures or blood pressures, dressing wounds, treating bedsores, giving enemas or douches, rubbing with alcohol, massaging, or performing catheterizations.

Answer patients' calls and determine how to assist them.

Sterilize equipment and supplies, using germicides, sterilizer, or autoclave.

Measure and record patients' vital signs, such as height, weight, temperature, blood pressure, pulse, and respiration.

Collect samples, such as blood, urine, or sputum from patients, and perform routine laboratory tests on samples.

Supervise nurses' aides or assistants.

Make appointments, keep records, or perform other clerical duties in doctors' offices or clinics.

Evaluate nursing intervention outcomes, conferring with other healthcare team members as necessary.
